

LET'S CREATE YOUR TRANSPORT SYSTEM

STRENGTHENING COMPETITIVENESS WITH AUTOMATED TRANSPORT SYSTEMS

Nowadays, it is necessary to constantly improve the production processes of the same products. One of the main characteristics for strengthening competitiveness on the market is exactly automated transport systems.

Transport systems are intended for large-scale and small-scale production. The main task of the transport system is the automated transport of finished products from the machine to the desired location.

Flexible transport systems achieve high productivity and economy even with small batches. Systems are modified according to your needs in accordance with new technological achievements and trends.

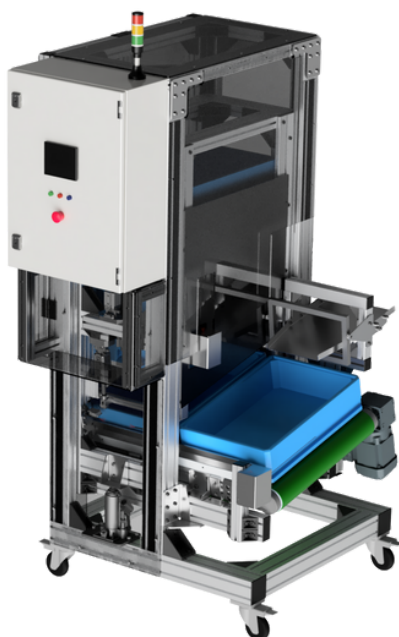

NUMEROUS ADVANTAGES

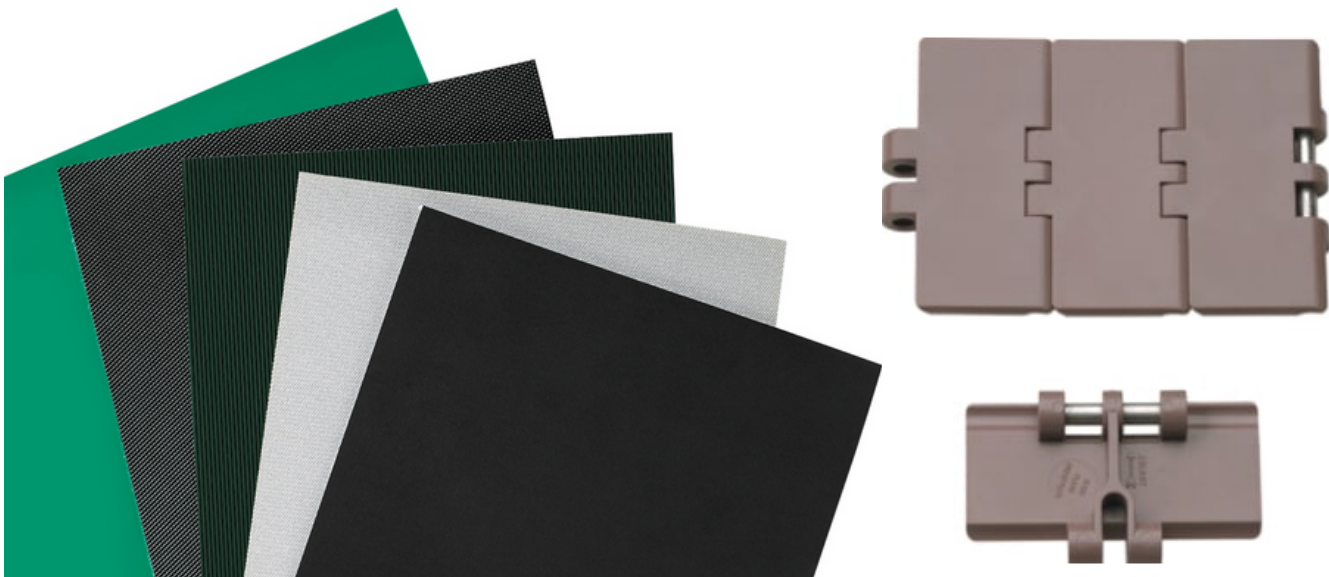

Transport systems provide you with numerous advantages:

- saving time
- saving money
- possibility of automation
- the possibility of transporting products of all shapes and materials
- modularity
- suitable for all industries
- simple implementation in the production plant

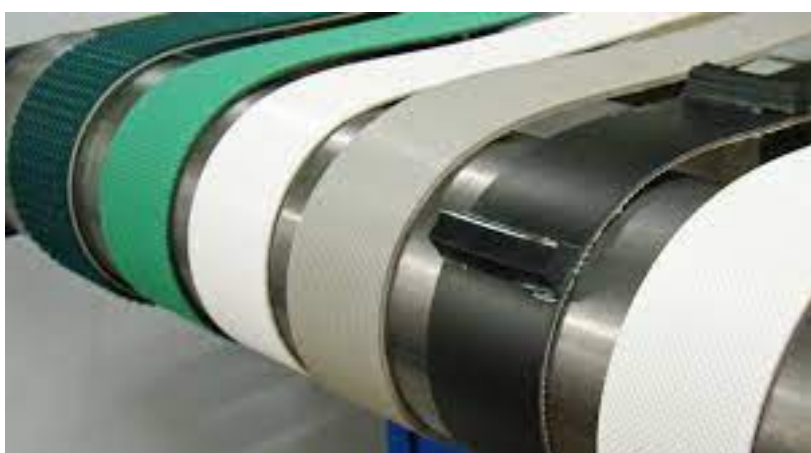

CONVEYOR BELTS

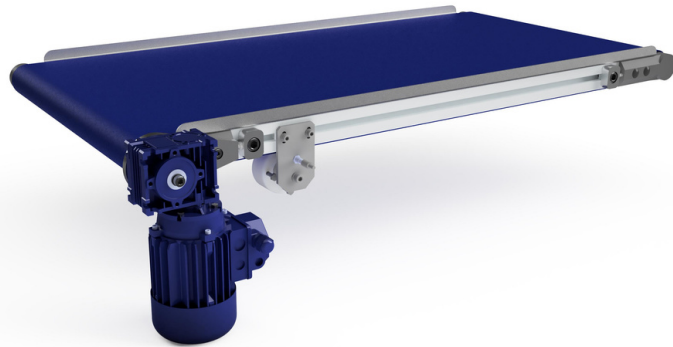

A wide range of different belts for all types of applications will meet the needs of your production plant.

Together with you, we will find a strap that perfectly suits your needs.

STANDARD TRANSPORT SYSTEMS

The standard dimensions of transport systems are:

- 1000x600
- 1500x600
- 2000x600

Thickness

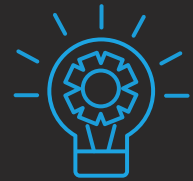

- 35 mm
- 50 mm
- 95 mm

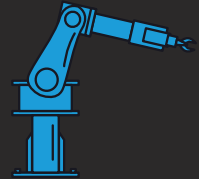

The dimensions can be adjusted according to your needs.

SERVICES

CONSTRUCTION,
MANUFACTURE & DEVELOPMENT

INDUSTRIAL AUTOMATION

WATER JET CUTTING

3D MEASUREMENT

ELECTRICAL WIRE EROSION (EDM)

MILING

GRINDING
